

ELSA SENSING CABLE 3L-LS

3L-LS is the sensing cable used to detect water and slightly corrosive and conductive liquids

CHARACTERISTICS & PERFORMANCE:

- Application : Water and slightly corrosive conductive liquids
- Diameter size : 6.3mm average
- Continuity wires : White & Red insulated with flame-retardant polymer
- Sensing wires : 2 x Black wires, semi-conductive polymer
- Carrier : Flame-retardant polymer material with greenish colour in high visibility
- Fire resistance : Non-flame propagating and self-extinguishing

3L-LS SENSING CABLE LENGTH:

- Available in random length or cut-to length as per requirement

3L-LS SENSING CABLE CONNECTIONS/JOINTS:

- Male/female connector (i.e. all connections/joints is modular)
- Hot-Shrink-Tube approach (i.e. all connections/joints is fix)
